DETAILED ACTION

Election/Restriction

1. This application contains claims directed to patentably distinct diseases and corresponding enzymes used to treat the diseases.

The patentably distinct diseases are each of the diseases recited in claim 2 and the patentably distinct enzymes are each of the enzymes recited in claim 3. Table 1 of the specification clearly states the disease and the specific enzyme that is deficient in the disease. A search of all the inventions in the patent literature and the non-patent literature cannot be made without serious burden because the inventions require separate searches that have different limits, boundaries, scope, and subject matter. For example, a search for a method of treating GM1 gangliosidosis by administration of β -galactosidase would not reveal art pertaining to a method of treating Wolman Disease by administration of acid lipase.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed disease and corresponding enzyme used to treat the elected disease, even though this requirement is traversed.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
